Amit Gangwar

Noida, Uttar Pradesh | +91 8279497062 | gangwaramit449@gmail.com | linkedin.com/in/amit-gangwar-a63174250 | github.com/Xerox563

Technical Skills

Languages: C++, Python, JavaScript, Java, TypeScript, HTML, CSS
Frontend: React.js, Next.js, State Management (Redux, Context API), Tailwind CSS
Backend & APIs: Node.js, Express.js, FastAPI, RabbitMQ
Cloud & Architecture: AWS (Lambda, S3), SQL, PostgreSQL, MongoDB, Redis
DevOps & Tools: CI/CD pipelines, Docker, Git, Linux, Vim, Postman

Work Experience

i8CLOUD **July 2025 – Present**
Software Developer *Noida, Uttar Pradesh*

- Developed a **LightSpeed - Odoo integration** to sync products, inventory, and pricing across 10+ stores, using AWS-backed event-driven and scheduled pipelines to ensure near real-time updates, idempotent processing, and reliable error handling.
- Built **event-driven APIs** for an automated email & WhatsApp reminder system using cron jobs and webhooks, ensuring a **fault-tolerant** architecture that reduced missed observances by over 50%.
- Designed and developed an Event and Shift Management system used by 20k+ users, improving coordination and reducing manual effort.
- Maintained backend services and implemented background job processing using Python, Celery, and Redis, offloading heavy tasks to improve performance and reduce server load.

WittyHat **May 2025 – June 2025**
Software Developer Intern *Hybrid*

- Built and maintained backend services for YouTube automation using **Python**, orchestrating uploads linked with background jobs utilizing **event-driven systems** and Celery workers.
- Hardened the frontend using **React** and secure Google auth, achieving a 95% delivery rate for notifications with **automated deployments** via **CI/CD pipelines**.
- Developed and deployed full-stack features that reduced crash rates from 3.8% to 1.2% while supporting 10k+ daily requests.
- Optimized application performance and frontend responsiveness via lazy loading, caching strategies, and **MongoDB** indexing, reducing app load time from 3.2s to 2.2s.

Avronn **February 2025 – April 2025**
Frontend Developer Intern *Noida, Uttar Pradesh*

- Developed the Drishti fleet management dashboard, processing and visualizing telematics data (GPS, trip, and vehicle metrics) to enable real-time vehicle tracking and operational insights.
- Scaled to 1.5K+ concurrent users with real-time telematics updates via APIs, using Zustand for efficient state management.

Projects

CollabCode: Real-Time Collaborative Code Editor | *React, Node.js, Express, Socket.io, WebRTC, Yjs, MongoDB* **Code**

- Built a real-time collaborative coding platform enabling multiple users to code simultaneously with conflict-free syncing, and integrated a real-time chat system for instant participant communication.
- Implemented multi-user video/audio conferencing delivering low-latency communication for interviews and pair programming.
- Reduced server load by adding debounced document persistence and optimized queries, achieving ~80% fewer database writes during active sessions.

EduSphere: Immersive 3D Virtual Classroom | *React, Node.js, TypeScript, Three.js, Socket.io, MongoDB, Anthropic AI* **Code**

- Developed an immersive 3D metaverse classroom with real-time multiplayer interaction, customizable avatars, and dual camera views.
- Implemented scalable real-time rooms and backend services for user and session management, integrating video-based learning and AI-generated quizzes.
- Enhanced user engagement with gamified elements like dynamic environments and enabled export of structured quiz reports .

DevTrack: Web Tracker & Analytics Dashboard | *React, Node.js, SQLite, MV3 Extension, Recharts, Framer Motion* **Code**

- Built **DevTrack Chrome Extension (MV3)** tracking browsing activity across **40+ domains** with Pomodoro timer, idle detection, incognito awareness, and per-domain todo/notes widget, used **TypeScript**, Chrome Storage API, and esbuild.
- Developed full-stack backend **+ React** dashboard with **25+ REST APIs**, 6 analytics views, gamification engine (6 levels, points system), streak tracking, CSV/JSON export, and 30s auto-refresh.

Education

Bundelkhand Institute of Engineering and Technology Jhansi, UP **November 2021 – May 2025**
B.Tech in Information Technology *8.01/10 CGPA*

Achievements & Extracurricular

- **Hackathon Winner:** First place among 50 teams at **i8CLOUD Hackathon 2025** - built an AI-powered content co-pilot integrating cloud services for automated blog generation and multilingual translation.
- **Competitive Programming: Expert** on **Codeforces** (**1635**), **Knight** on **LeetCode** (**1872**), solved **1600+** problems across platforms including **GeeksforGeeks**.
- **Content & Open Source:** Authored 5+ articles on software development on **Medium**, built and open-sourced 6+ **AI-agents**.
